

EDUCATION

State University of New York at Stony Brook -- Mathematics Bachelor's	2020.09-2025.05
Major Coursework: Numerical Analysis; Applications of Complex Functions; Partial Differential Equations and Analysis; Computational Geometry; Dynamical Systems and Differential Equations; Mathematical Modeling.	
Boston University -- Business Analytics Master's	2025.09-2026.05
Major Coursework: Python & SQL for Business Analytics; Marketing Analytics; Data Mining; Cloud Analytics; Enterprise Risk Analysis; Quantitative and Qualitative Decision Analysis.	

WORK EXPERIENCE

Lujiazui Cathay Life Insurance Co., Ltd.	Credit Analysis Intern	2025.07-2025.08
- Used the Wind credit evaluation system to query and organize information on bond issuers, credit ratings, financial indicators, and financing structures, providing data support for credit analysis and valuation work. - Used Excel to summarize related data and organize charts, supporting the preparation and presentation of credit research materials. - Tracked the credit status of local government financing platforms; organized core information including financial performance, debt structure, and government support; assisted the team in credit risk analysis.		

PROJECT EXPERIENCE

E-Commerce Advertising ROI Analysis Project	2026.03-2026.04
- Analyzed e-commerce advertising campaign performance based on Google, Facebook, and Shopify advertising data, evaluating the impact of ad placement on sales conversion and revenue growth. - Cleaned and organized advertising data; calculated key marketing metrics including ROAS, CTR, and CPA. - Proposed advertising optimization recommendations based on analysis results, including A/B testing strategies and budget allocation optimization, to improve advertising efficiency.	
PySpark-Based Large-Scale Data Processing and Analysis	2026.02-2026.04
- Built a PySpark data analysis environment on AWS EC2, loaded and processed large-scale datasets, and completed structured data storage and management. - Used Spark DataFrame to clean and transform raw data and create temporary views, providing a data foundation for subsequent SQL analysis. - Wrote Spark SQL queries for data aggregation and statistical analysis, calculated key indicators, and explored data distributions and trends. - Used Spark distributed computing capabilities to improve data processing efficiency and summarized business insights through data analysis.	
Python-Based Linear Model Data Analysis	2024.02-2024.05
- Data processing: used Python to build a logistic regression model for a classification task on the MNIST dataset. - Model training: implemented gradient descent (GD) and stochastic gradient descent (SGD) methods through custom functions to train a binary logistic regression model. - Results visualization: plotted classification result charts to visually present data analysis outcomes.	
Numerical Linear Algebra Computing Project	2025.02-2025.04
- Gaussian elimination: implemented Gaussian elimination with partial pivoting to solve dense systems of linear equations, such as 100 x 100 matrices. - LU decomposition: designed a blocked LU decomposition algorithm to improve the efficiency of large-scale matrix operations. - Cramer's rule: wrote a recursive determinant function supporting high-order matrices. - Reproduced and generated a comparison report in Python (NumPy), visualizing error and runtime curves.	
Maple-Based Implementation and Analysis of Historical Encryption Algorithms	2024.10-2024.12
- Algorithm research: selected one encryption algorithm from the Four-square Cipher, Solitaire Cipher, and ADFGVX Cipher; conducted in-depth research on its historical background, design principles, and application scope; analyzed its advantages, disadvantages, and security. - Code implementation: used Maple to write encryption and decryption functions and verified code accuracy through multiple groups of test cases.	

PROFESSIONAL SKILLS

- Language Skills: fluent English; beginner Japanese.
- Office Skills: (Proficient) Python, SQL, R, Microsoft Office; (Familiar) Java, MATLAB, Power BI, Maple.
